

senior full-stack software developer

Bellomy, a dynamic market intelligence consultancy with a diverse national Fortune 500 client base, has an immediate opening for a talented, creative Software Developer in our Winston-Salem, NC, headquarters.

We are a leader in the development and deployment of technology to assist clients in achieving their business objectives. Whether it's our robust infrastructure, our use of leading-edge software and development tools, or the expertise of our IT professionals, Bellomy has earned the respect of clients, partners and industry experts.

We're looking for a self-motivated individual with an aptitude for software development and an interest in all technology to join our established team of developers and technologists to participate in building our SmartIDEAS systems platform. Strong development skills are critical and the ideal candidate will be versed in a variety of web development environments. Some responsibilities include: Software development, collaborating on software design and architecture, creating and maintaining documentation for software systems, implementation of client solutions, and contributing innovative ideas for products and features.

We're seeking a candidate with a true passion for technology, someone who is constantly exploring and learning. We offer the opportunity to work with progressive technology and highly experienced professionals in a collaborative, team-focused environment. We're passionate about providing our clients with innovative solutions and actionable insights, and we accomplish this through our team of talented individuals. Agile development methodologies empower our team to accomplish great things for clients.

Skills + qualifications:

- Strong analysis, design, development, and testing skills
- 5+ years of experience working with core web technologies: HTML, CSS, JavaScript
- 5+ years of experience working with back-end languages such as C++, Java or .NET
- Experience working with service-oriented architectures
- Python experience strongly preferred
- Experience with cloud platforms, such as AWS, Azure or IBM cloud strongly preferred
- Ability to multitask, prioritize, and work under tight deadlines
- Strong attention to detail and commitment to superior quality work
- Requires excellent written and oral communications skills

Candidates must be lawfully and fully (without restriction) employable in the United States, either by citizenship or by authorization from the Department of Homeland Security and the Labor Department.

Qualified candidates: please send **RÉSUMÉ, SALARY REQUIREMENTS, AND A COVER LETTER** indicating how your skills and experience match our requirements to careers@bellomy.com. Include Senior Full-Stack Software Developer in the subject line. No phone calls please.
